

Dear Resident,

Your building has joined Compost Collective

The Compost Collective program supports residents living in apartment buildings and houses to compost with other households.

Council provides support through:

- Delivering free kitchen benchtop bins, compost bins and aerators for composting
- Helping to set up the compost bin
- Providing an education session on-site and ongoing support
- Delivering educational materials such as composting guides

Residents are encouraged to:

- Use and maintain the compost bin/s
- Help to educate and motivate other residents or neighbours wishing to join the project

If you would like to receive a free kitchen benchtop bin to start composting or have any questions about the program, please email:
Rethink.Waste@innerwest.nsw.gov.au

Sincerely,

Rubi Ortiz
