About the community profile	139

Welcome to the Inner West Council area Community Profile

The Inner West Council area is located in the inner-western Sydney suburbs, about 4-10 kilometres west of the Sydney CBD.

The Inner West Council area Community Profile provides demographic analysis for the Council and its suburbs based on results from the 2011, 2006, 2001, 1996 and 1991 Censuses of Population and Housing. The profile is updated with population estimates when the Australian Bureau of Statistics (ABS) releases new figures.

Profile areas

Stanmore Ward

Compiled and presented in profile.id by .id, the population experts.

Settlement history

Settlement of the area dates from the 1790s when the first land grants were made, with land used mainly for farming and timber-getting. Population was minimal until the 1830s. Significant residential, commercial and industrial growth took place from the 1880s into the early 1900s, aided by the opening of the railway line. Expansion continued during the post-war years, when many flats, apartments and units were built. From the 1970s gentrification occurred, particularly in the suburbs of Camperdown and Newtown, with many commercial and industrial sites converted into housing, and many old houses restored. The population declined slightly during the 1990s, and then increased slightly between 2001 and 2011 as new dwellings were added to the area.

Land use

Stanmore Ward is an established residential area, with some industrial areas, and some commercial areas (particularly along Audley Street, Enmore Road, King Street, New Canterbury Road and Parramatta Road).

Major features

Major features of the area include Stanmore Plaza, the retail areas along Audley Street, Enmore Road, King Street, New Canterbury Road and Parramatta Road, Sydney TAFE (Design Centre Enmore and Petersham College), MetroRehab Hospital, Inner West Council Petersham Service Centre, Portuguese Ethnographic Museum of Australia, Enmore Theatre, Chrissie Cotter Gallery, Salvation Army Booth College (Stanmore House - Conference and Training Centre), Fanny Durack Pool, Brighton Street Reserve, Camperdown Commons, Camperdown Memorial Rest Park, Camperdown Park, Crammond Park, Enmore TAFE Park, Eve Sharpe Reserve, Matt Hogan Reserve, Maundrell Park, Montague Gardens, Morton Park, Norton Russell Reserve, O'Dea Reserve, Oxford Street Reserve, Peace Reserve, Pearl Street Reserve, Petersham Park, Peter Cotter Reserve, Ryan Park, Stanmore Reserve, Weekley Park, Whiteley Reserve, Camperdown Cemetery, St Stephens Cemetery, Petersham Bowling Club, the Lewisham, Petersham and Stanmore railway stations, Newington College, Trinity Grammar School and numerous other schools.

Included areas

Stanmore Ward encompasses the suburbs of Enmore and Stanmore, most of the suburbs of Lewisham and Petersham, the Inner West Council area part of the suburb of Camperdown, most of the Inner West Council area part of the suburb of Newtown, and small parts of the suburbs of Dulwich Hill, Marrickville, St Peters and Summer Hill.

Stanmore Ward

Estimated Resident Population (ERP)

The Estimated Resident Population is the OFFICIAL Inner West Council area population for 2016. For areas within the Inner West Council area, the ERP is not an official count but an experimental estimate which is subject to review after the next Census.

Populations are counted and estimated in various ways. The most comprehensive population count available in Australia is derived from the Census of Population and Housing conducted by the Australian Bureau of Statistics every five years. However the Census count is generally an under-estimate of the actual population, due to people missed in the Census and people overseas on Census night. To provide a more accurate population figure which is updated more frequently than every five years, the Australian Bureau of Statistics also produces "Estimated Resident Population" (ERP) numbers for the Inner West Council area. Estimates for areas within the Inner West Council area are based on aggregates of SA1s derived from population distributions applicable at the 2011 Census. Actual populations may vary slightly where population growth has not been uniform since the previous Census.

See [data notes](#) for a detailed explanation of different population types, how they are calculated and when to use each one.

Estimated Resident Population (ERP)

Stanmore Ward

Service age groups

The Age Structure of Stanmore Ward provides key insights into the level of demand for age based services and facilities such as child care. It is an indicator of Stanmore Ward's residential role and function and how it is likely to change in the future.

Service age groups divide the population into age categories that reflect typical life-stages. They indicate the level of demand for services that target people at different stages in life and how that demand is changing.

To get a more complete picture Stanmore Ward's Age Structure should be viewed in conjunction with [Household Types](#) and [Dwelling Types](#).

Dominant groups

Analysis of the service age groups of Stanmore Ward in 2011 compared to Inner West Council area shows that there was a lower proportion of people in the younger age groups (0 to 17 years) as well as a lower proportion of people in the older age groups (60+ years).

Overall, 15.2% of the population was aged between 0 and 17, and 12.7% were aged 60 years and over, compared with 17.5% and 15.8% respectively for Inner West Council area.

The major differences between the age structure of Stanmore Ward and Inner West Council area were:

- A *larger* percentage of 'Young workforce' (24.3% compared to 20.3%)
- A *larger* percentage of 'Tertiary education & independence' (10.2% compared to 8.5%)
- A *smaller* percentage of 'Seniors' (4.9% compared to 6.3%)
- A *smaller* percentage of 'Older workers & pre-retirees' (10.5% compared to 11.7%)

Emerging groups

From 2006 to 2011, Stanmore Ward's population increased by 1,988 people (6.7%). This represents an average annual population change of 1.3% per year over the period.

The largest changes in the age structure in this area between 2006 and 2011 were in the age groups:

- Parents and homebuilders (35 to 49) (+567 people)
- Babies and pre-schoolers (0 to 4) (+331 people) Empty
- nesters and retirees (60 to 69) (+319 people) Primary
- schoolers (5 to 11) (+279 people)

Stanmore Ward

Five year age groups

The Age Structure of Stanmore Ward provides key insights into the level of demand for age based services and facilities such as child care. It is also an indicator of Stanmore Ward's residential role and function and how it is likely to change in the future.

Five year age groups present a classic age profile of the population. Each age group covers exactly five years, which enables direct comparison between each group.

To get a more complete picture Stanmore Ward's Age Structure should be viewed in conjunction with [Household Types](#) and [Dwelling Types](#).

Dominant groups

Analysis of the five year age groups of Stanmore Ward in 2011 compared to Inner West Council area shows that there was a lower proportion of people in the younger age groups (under 15) as well as a lower proportion of people in the older age groups (65+).

Overall, 13.3% of the population was aged between 0 and 15, and 8.6% were aged 65 years and over, compared with 15.4% and 11.2% respectively for Inner West Council area.

The major differences between the age structure of Stanmore Ward and Inner West Council area were:

- A *larger* percentage of persons aged 25 to 29 (12.1% compared to 9.7%)
- A *larger* percentage of persons aged 20 to 24 (8.5% compared to 6.8%)
- A *larger* percentage of persons aged 30 to 34 (12.2% compared to 10.6%)
- A *larger* percentage of persons aged 35 to 39 (11.0% compared to 10.2%)

Emerging groups

From 2006 to 2011, Stanmore Ward's population increased by 1,984 people (6.7%). This represents an average annual population change of 1.3% per year over the period.

The largest changes in age structure in this area between 2006 and 2011 were in the age groups:

- 0 to 4 (+331 persons)
- 60 to 64 (+266 persons)
- 40 to 44 (+250 persons)
- 45 to 49 (+243 persons)

Stanmore Ward

Single year of age

The Age Structure of Stanmore Ward provides key insights into the level of demand for age based services and facilities. It is also an indicator of Stanmore Ward's demographic role and function and how it is likely to change in the future.

Single year of age data is presented as an age-sex pyramid which enables the shape of the population to be compared geographically, temporally and by gender. For example, longer female life expectancy usually leads to the pyramid skewing to the right in the older age groups.

To get a more complete picture Stanmore Ward's Age Structure should be viewed in conjunction with [Household Types](#) and [Dwelling Types](#).

Stanmore Ward

Ancestry

Ancestry defines the cultural association and ethnic background of an individual going back three generations. Ancestry is a good measure of the total size of cultural groups in Stanmore Ward regardless of where they were born or what language they speak.

Ancestry data, should be combined with data on [Birthplace](#), [Language Spoken at Home](#) and [Religion](#) for a more complete picture of Stanmore Ward's ethnic characteristics.

Please note that the "Australian Aboriginal" and "Torres Strait Islander" categories in this topic are not considered to be a reliable estimate of the indigenous peoples of Australia. For information on this group, please use the "Aboriginal and Torres Strait Islander Population" found on the [Population](#) page.

Dominant groups

Analysis of the ancestry responses of the population in Stanmore Ward in 2011 shows that the top five ancestries nominated were:

- English (9,688 people or 30.5%)
- Australian (8,770 people or 27.7%)
- Irish (4,594 people or 14.5%)
- Scottish (3,116 people or 9.8%)
- Italian (1,468 people or 4.6%)

In combination these five ancestries account for 27,636 responses in total, or 87.14% of all responses.

The major differences between the ancestries of the population in Stanmore Ward and Inner West Council area were:

- A *larger* percentage of people with Australian ancestry (27.7% compared to 24.0%)
- A *larger* percentage of people with English ancestry (30.5% compared to 27.1%)
- A *larger* percentage of people with Irish ancestry (14.5% compared to 12.3%)
- A *smaller* percentage of people with Chinese ancestry (4.6% compared to 7.5%)

Emerging groups

The largest changes in the reported ancestries of the population in this area between 2006 and 2011 were:

- English (+1,583 persons)
- Irish (+744 persons)
- Scottish (+537 persons)
- Chinese (+232 persons)

Stanmore Ward

Birthplace

Country of Birth data identifies where people were born and is indicative of the level of cultural diversity in Stanmore Ward. The mix of Country of Birth groups is also indicative of historical settlement patterns, as source countries for Australia's immigration program have varied significantly over time.

To get a more complete picture of cultural and ethnic characteristics, Stanmore Ward's Country of Birth data should be viewed together with [Ancestry](#), [Language Spoken at Home](#) and [Religion](#).

Dominant groups

Analysis of the country of birth of the population in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a smaller proportion of people born overseas, as well as a smaller proportion of people from a non-English speaking background.

Overall, 28.7% of the population was born overseas, and 17.9% were from a non-English speaking background, compared with 34.8% and 24.7% respectively for Inner West Council area.

The largest non-English speaking country of birth in Stanmore Ward was Greece, where 1.4% of the population, or 448 people, were born.

The major difference between the countries of birth of the population in Stanmore Ward and Inner West Council area was:

- A smaller percentage of people born in China (1.2% compared to 3.3%)

Emerging groups

Between 2006 and 2011, the number of people born overseas increased by 770 or 9.2%, and the number of people from a non-English speaking background increased by 443 or 8.5%.

The largest changes in birthplace countries of the population in this area between 2006 and 2011 were for those born in:

- United Kingdom (+123 persons)
- Ireland (+96 persons)
- Philippines (+92 persons)
- India (+81 persons)

Stanmore Ward

Overseas arrivals

The Year of Arrival data records when the overseas born population arrived in Australia. The data shows the degree to which areas are 'ports' for new overseas arrivals and reveals the role of Stanmore Ward in housing the overseas-born. The number of recent overseas arrivals in an area is often determined by housing affordability, employment opportunities and pre-existing communities located in the area.

Stanmore Ward's Year of Arrival data, when used with [Birthplace](#), [Religion](#) and [Language Spoken at Home](#) data, is a good indicator of the likely need for services in migrant communities.

Overseas arrivals

Stanmore Ward - Overseas born (Usual residence)		2011

Dominant groups

Analysis of the year of arrival for the overseas born population of Stanmore Ward in 2011 compared to Inner West Council area shows that there was a larger proportion of people who arrived before 2001, and a smaller proportion of recent overseas arrivals (those who arrived between 2006 and 2011).

Overall, 66.5% of the overseas born population arrived before 2001, and 19.2% arrived during or after 2006, compared with 63.0% and 21.6% respectively for Inner West Council area.

The major differences in year of arrival data in the population between Stanmore Ward and Inner West Council area are:

- A *larger* percentage of arrivals between 1971 and 1980 (14.3% compared to 12.5%)
- A *larger* percentage of arrivals between 1981 and 1990 (17.7% compared to 16.1%)
- A *smaller* percentage of arrivals between 2006 and 9 Aug 2011 (19.2% compared to 21.6%)

Stanmore Ward

Proficiency in English

Proficiency in English measures the self-assessed proficiency in spoken English of people who speak a language other than English at home. The data, when viewed with other ethnic and cultural indicators, such as [Ancestry](#), [Country of Birth](#), [Language Spoken at Home](#) and [Religion](#), reflects Stanmore Ward's ethnic composition and how long the overseas born have been in Australia. This helps service providers determine whether they need to communicate with the local population in languages other than English.

Proficiency in English

Stanmore Ward

Source: Australian Bureau of Statistics, Census of Population and Housing, 2006 and 2011 (Usual residence data)
Compiled and presented in profile.id by .id, the population experts.

Dominant groups

Analysis of the language spoken at home by the population of Stanmore Ward in 2011 compared to Inner West Council area shows that there was a larger proportion of people who spoke English only, and a smaller proportion of those speaking a non-English language (either exclusively, or in addition to English).

Overall, 72.7% of the population spoke English only, and 19.9% spoke a non-English language, compared with 64.5% and 29.2% respectively for Inner West Council area.

The dominant language spoken at home, other than English, in Stanmore Ward was Greek, with 2.8% of the population, or 904 people speaking this language at home.

The major differences between the languages spoken at home for the population of Stanmore Ward and Inner West Council area in 2011 were:

- A *smaller* percentage speaking Mandarin at home (1.2% compared to 3.0%)
- A *smaller* percentage speaking Italian at home (1.7% compared to 3.3%)
- A *smaller* percentage speaking Cantonese at home (1.0% compared to 2.1%)
- *smaller* percentage speaking Vietnamese at home (1.0% compared to 2.0%)

Emerging groups

Between 2006 and 2011, the number of people who spoke a language other than English at home increased by 380 or 6.4%, and the number of people who spoke English only increased by 2,311 or 11.1%.

The largest changes in the spoken languages of the population in Stanmore Ward between 2006 and 2011 were for those speaking:

- French (+89 persons)
- Filipino/Tagalog (+71 persons)
- Nepali (+70 persons)
- Greek (-67 persons)

Stanmore Ward

Religion

Stanmore Ward's religion statistics provide an indicator of cultural identity and ethnicity when observed in conjunction with other key variables. Religion data reveal the major concentrations of religions as well as revealing the proportion of people with no religious affiliation. There are a number of reasons for different religious compositions across areas including the country of birth and ethnic background of the population, the age of the population (belief in religion is generally stronger, the older the population) and changes in values and belief systems.

Stanmore Ward's religion statistics should be analysed in conjunction with other ethnicity statistics such as [Country of Birth](#) data and [Language Spoken](#) data to assist in identifying specific cultural and ethnic groups.

- Year 12 or equivalent (+2,810 persons)
- Year 10 or equivalent (-274 persons)
- Year 8 or below (-259 persons)
- Year 11 or equivalent (-133 persons)

Stanmore Ward

Education institution attending

The share of Stanmore Ward's population attending educational institutions reflects the age structure of the population, as it is influenced by the number of children attending school; proximity to tertiary education, which can mean young adults leaving home to be nearer to educational facilities and; the degree to which people are seeking out educational opportunities in adulthood, especially in their late teens and early twenties.

This data is often combined with [Age Structure](#) to identify areas with significant university student populations.

Analysis of the share of the population attending educational institutions in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a lower proportion attending primary school, a lower proportion attending secondary school, and a higher proportion engaged in tertiary level education.

Overall, 4.7% of the population were attending primary school, 3.1% of the population were attending secondary institutions, and 11.8% were learning at a tertiary level, compared with 5.7%, 3.8% and 9.5% respectively for Inner West Council area.

The major differences between the share of the population attending learning institutions in Stanmore Ward and Inner West Council area were:

- A *larger* percentage of persons attending University (9.2% compared to 7.2%)
- A *smaller* percentage of persons not attending (69.9% compared to 71.1%)
- A *smaller* percentage of persons attending a Government primary school (4.7% compared to 5.7%)

Emerging groups

From 2006 to 2011, Stanmore Ward's population increased by 2,001 people (+6.7%). This represents an average annual change of 1.31% per year over the period.

The largest changes in the number of persons attending education institutions in Stanmore Ward, between 2006 and 2011 were in those who nominated:

- University (+394 persons)
- Primary school (+298 persons) Primary -
- Government (+251 persons) Secondary
- school (+171 persons)

Stanmore Ward

Need for assistance

Stanmore Ward's disability statistics relate directly to need for assistance due to a severe or profound disability. The information may be used in the planning of local facilities, services such as day-care and occasional care and in the provision of information and support to carers. Stanmore Ward's disability statistics help in understanding the prevalence of people who need support in the community, and along with information on [Unpaid Care](#) to a person with a disability, how that support is provided.

Please note: A person's reported need for assistance is based on a subjective assessment and should therefore be treated with caution. See the [specific data notes](#) for further detail.

Dominant groups

Analysis of the need for assistance of people in the Inner West Council area compared to Inner West Council area shows that there was a lower proportion of people who reported needing assistance with core activities.

Overall, 3.0% of the population reported needing assistance with core activities, compared with 4.3% for Inner West Council area.

The major differences in the age groups reporting a need for assistance in Stanmore Ward and Inner West Council area were:

- A *smaller* percentage of persons aged 75 to 79 (20.6% compared to 28.5%)
- A *smaller* percentage of persons aged 80 to 84 (29.9% compared to 37.0%)
- A *smaller* percentage of persons aged 85 and over (57.5% compared to 61.5%)

Emerging groups

There were no major differences in Stanmore Ward between 2006 and 2011.

Stanmore Ward

Employment status

Stanmore Ward's employment statistics are an important indicator of socio-economic status. The levels of full or part-time employment, unemployment and labour force participation indicate the strength of the local economy and social characteristics of the population. Employment status is linked to a number of factors including [Age Structure](#), which influences the number of people in the workforce; the economic base and employment opportunities available in the area and; the education and skill base of the population ([Occupations](#), [Industries](#), [Qualifications](#)).

Employment status

Stanmore Ward - Total persons in the labour force

Source: Australian Bureau of Statistics, Census of Population and Housing, 2006 and 2011 (Usual residence data)
Compiled and presented in profile.id by .id, the population experts.

Dominant groups

The size of Stanmore Ward's labour force in 2011 was 19,690, of which 5,389 were employed part-time and 13,167 were full time workers.

Analysis of the employment status (as a percentage of the labour force) in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a similar proportion in employment, as well as a similar proportion unemployed. Overall, 95.1% of the labour force was employed (68.1% of the population aged 15+), and 4.9% unemployed (3.5% of the population aged 15+), compared with 94.9% and 5.1% respectively for Inner West Council area.

The labour force participation rate refers to the proportion of the population aged 15 years and over that was employed or actively looking for work. *"The labour force is a fundamental input to domestic production. Its size and composition are therefore crucial factors in economic growth. From the viewpoint of social development, earnings from paid work are a major influence on levels of economic well-being."* ([Australian Social Trends 1995](#)).

Analysis of the labour force participation rate of the population in Stanmore Ward in 2011 shows that there was a higher proportion in the labour force (71.6%) compared with Inner West Council area (67.6%).

Emerging groups

Between 2006 and 2011, the number of people employed in Stanmore Ward showed an increase of 1,556, and the number unemployed showed an increase of 202. In the same period, the number of people in the labour force showed an increase of 1,758 or 9.8%.

Stanmore Ward

Industry sector of employment

Stanmore Ward's industry statistics identify the industry sectors in which the residents work (which may be within the residing area or elsewhere). This will be influenced by the skill base and socio-economic status of the residents as well as the industries and employment opportunities present in the region.

When viewed in conjunction with [Residents Place of Work](#) data and [Method of Travel to Work](#), industry sector statistics provide insights into the relationship between the economic and residential role of the area.

Dominant groups

An analysis of the jobs held by the resident population in Stanmore Ward in 2011 shows the three most popular occupations were:

- Professionals (7,743 people or 41.1%)
- Managers (2,792 people or 14.8%)
- Clerical and Administrative Workers (2,767 people or 14.7%)

In combination these three occupations accounted for 13,302 people in total or 70.6% of the employed resident population.

In comparison, Inner West Council area employed 36.8% in Professionals; 15.8% in Managers; and 14.3% in Clerical and Administrative Workers.

The major differences between the jobs held by the population of Stanmore Ward and Inner West Council area were:

- A *larger* percentage of persons employed as Professionals (41.1% compared to 36.8%)
- A *smaller* percentage of persons employed as Labourers (3.7% compared to 4.8%)

Emerging groups

The number of employed people in Stanmore Ward increased by 1,679 between 2006 and 2011.

The largest changes in the occupations of residents between 2006 and 2011 in Stanmore Ward were for those employed as:

- Professionals (+1,271 persons)
- Managers (+375 persons)
- Clerical and Administrative Workers (+128 persons)
- Labourers (-115 persons)

Stanmore Ward

Method of travel to work

Stanmore Ward's commuting statistics reveal the main modes of transport by which residents get to work. There are a number of reasons why people use different modes of transport to get to work including the availability of affordable and effective public transport options, the number of motor vehicles available within a household, and the distance travelled to work.

Commuting data is very useful in transport planning as it informs decision-makers about the availability, effectiveness and utilisation of local transport options, particularly when analysed with [Residents Place of Work](#) data and [Car Ownership](#).

Dominant groups

Analysis of the voluntary work performed by the population in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a higher proportion of people who volunteered for an organisation or group. Overall, 18.2% of the population reported performing voluntary work, compared with 16.4% for Inner West Council area.

Emerging groups

The number of volunteers in Stanmore Ward increased by 685 people between 2006 and 2011.

Stanmore Ward

Unpaid domestic work

There has been increased interest in identifying, acknowledging and valuing the unpaid work that supports home and community life. The changing amount of time spent on unpaid housework in different Household Types and, particularly the distribution of this work within the household, can indicate the changing roles of males, females and older children in society. The level of unpaid domestic work in Stanmore Ward may also be related to Household Income, as higher income households are able to outsource some of these tasks.

Stanmore Ward - Total persons

Unpaid domestic work

Source: Australian Bureau of Statistics, Census of Population and Housing, 2006 and 2011 (Usual residence data)
Compiled and presented in profile.id by .id, the population experts.

Dominant groups

Analysis of the unpaid domestic work performed by the population in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a lower proportion of persons who performed 15 hours or more of unpaid domestic work per week.

Overall, 13.5% of the population reported performing 15 hours or more of unpaid domestic work, compared with 15.6% for Inner West Council area.

The major differences between the share of the population performing unpaid domestic work in Stanmore Ward and Inner West Council area were:

- A *larger* percentage of persons who did between 5 and 14 hours of domestic work (31.9% compared to 27.9%)
- A *larger* percentage of persons who did domestic work (75.8% compared to 72.0%)
- A *larger* percentage of persons who did between 15 and 29 hours of domestic work (30.4% compared to 28.5%)
- A *smaller* percentage of persons who did no unpaid domestic work (15.2% compared to 19.2%)

Emerging groups

The largest changes in the number of people performing unpaid domestic work in Stanmore Ward, between 2006 and 2011 were those who:

- Did unpaid domestic work (+2,044 persons)
- Did less than 5 hours of domestic work (+991 persons)
- Did between 5 and 14 hours of domestic work (+829 persons)
- Did between 15 and 29 hours of domestic work (+203 persons)

Stanmore Ward

Unpaid care

The proportion of people providing unpaid care for the aged and disabled in Stanmore Ward can be an important indicator of the level of demand for aged care services and facilities by local and state governments. An increasing proportion of carers among the population may indicate inadequate aged care provision, or the need for in-home support, or support for the carers themselves. The level of care provided by individuals is likely to be affected by [Household Income](#), [Age Structure](#) and the ethnic makeup of the community ([Language Spoken](#)), as well as the sense of community cohesiveness.

Unpaid care

Dominant groups

Analysis of the unpaid care provided by the population in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a lower proportion of people who provided unpaid care either to family members or others. Overall, 8.6% of the population provided unpaid care, compared with 9.6% for Inner West Council area.

Emerging groups

The number of people who provided unpaid assistance to a person with a disability, long term illness or old age in Stanmore Ward increased by 286 between 2006 and 2011.

Stanmore Ward

Unpaid childcare

The role of unpaid childcare in Stanmore Ward is determined by many different factors. For example areas with high levels of unpaid child care may have a dominance of single income families with one significant earner, or there could be a lack of provision of paid child care in the area. The level to which people care for others children can also indicate the role of extended family (eg. grandparents caring for grandchildren, family day care).

The role of unpaid child care is a complex one so this topic should be viewed in conjunction with several others, including Household Type, Employment, Household Income and Educational Attendance.

Unpaid childcare

Dominant groups

Analysis of the unpaid child care provided by the population in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a lower proportion of people who provided unpaid child care either to their own or to other children. Overall, 21.2% of the population provided unpaid child care, compared with 24.0% for Inner West Council area.

The major differences between the share of the population providing unpaid child care in Stanmore Ward and Inner West Council area were:

- A *larger* percentage who did not provide care for children (70.0% compared to 67.7%)
- A *smaller* percentage who provided unpaid childcare for own child/ren (15.4% compared to 18.0%)

Emerging groups

The number of people who provided unpaid child care for their own and/or other people's children in Stanmore Ward increased by 883 between 2006 and 2011.

The largest changes in the number of people performing unpaid child care in Stanmore Ward, between 2006 and 2011 were those who:

- Provided no unpaid child care (+1,192 persons)
- Cared for their own child/ren (+801 persons)

Stanmore Ward

Individual income

Individual Income statistics are an indicator of socio-economic status. With other data sources, such as [Household Income](#), [Qualifications](#) and [Occupation](#), they help tell the story of the economic opportunities and socio-economic status of Stanmore Ward. The amount of income an individual receives is linked to a number of factors including [employment status](#), [age](#) (as for instance students and retirees often receive a lower income), qualifications and type of employment.

The incomes presented on this page are for the latest Census year only. For comparison of incomes over time, go to [Individual Income Quartiles](#).

Weekly individual income

Weekly gross income

Source: Australian Bureau of Statistics, Census of Population and Housing, 2011 (Usual residence data)
Compiled and presented in profile.id by .id, the population experts.

Dominant groups

Analysis of individual income levels in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a higher proportion of people earning a high income (those earning \$1,500 per week or more) and a lower proportion of low income people (those earning less than \$400 per week).

Overall, 23.9% of the population earned a high income, and 24.3% earned a low income, compared with 22.8% and 28.2% respectively for Inner West Council area.

The major differences between Stanmore Ward's individual incomes and Inner West Council area's individual incomes were:

- A larger percentage of persons who earned \$1500-\$1999 (11.4% compared to 9.9%)
- A larger percentage of persons who earned \$1000-\$1249 (9.8% compared to 8.6%)
- A larger percentage of persons who earned \$1250-\$1499 (7.9% compared to 6.9%)
- A smaller percentage of persons who earned Negative Income/ Nil income (5.4% compared to 7.1%)

Stanmore Ward

Individual income quartiles

Stanmore Ward's income statistics are an indicator of socio-economic status. With other data sources, such as [Household Income](#), [Qualifications](#) and [Occupation](#), they help tell the story of the area's economic opportunities and socio-economic status. Individual income levels are not comparable over time because of the influences of economic change such as wage level fluctuations and inflation. The income quartile method is the most objective method of comparing change in the income profile of a community over time.

A detailed explanation of how Individual Income quartiles are calculated and interpreted is available in [specific data notes](#).

Individual income quartiles

Stanmore Ward

Source: Australian Bureau of Statistics, Census of Population and Housing, 2006 and 2011 (Usual residence data)
Compiled and presented in profile.id by .id, the population experts.

Dominant groups

Income quartiles allow us to compare relative income-earning capabilities across time. Analysis of the distribution of the population by income quartile in Stanmore Ward compared to Inner West Council area shows that there was greater proportion of persons in the highest income quartile and a lesser proportion in the lowest income quartile.

Emerging groups

The most significant change in Stanmore Ward in persons between 2006 and 2011 was in the highest quartile which showed an increase of 1,180 persons.

Stanmore Ward

Household income

Households form the common 'economic unit' in our society. Stanmore Ward's Household Income is one of the most important indicators of socio-economic status. With other data sources, such as [Qualifications](#) and [Occupation](#), it helps to reveal the economic opportunities and socio-economic status of Stanmore Ward. It is important to note that income data is not necessarily a measure of wealth. For example, if an area has a large number of retirees this will produce a higher proportion of households with low income but the retirees may have large capital wealth. For this reason, household income should be viewed in conjunction with [Age](#) and [Household Composition](#).

The incomes presented on this page are for the latest Census year only. For comparison of incomes over time, go to [Household Income Quartiles](#).

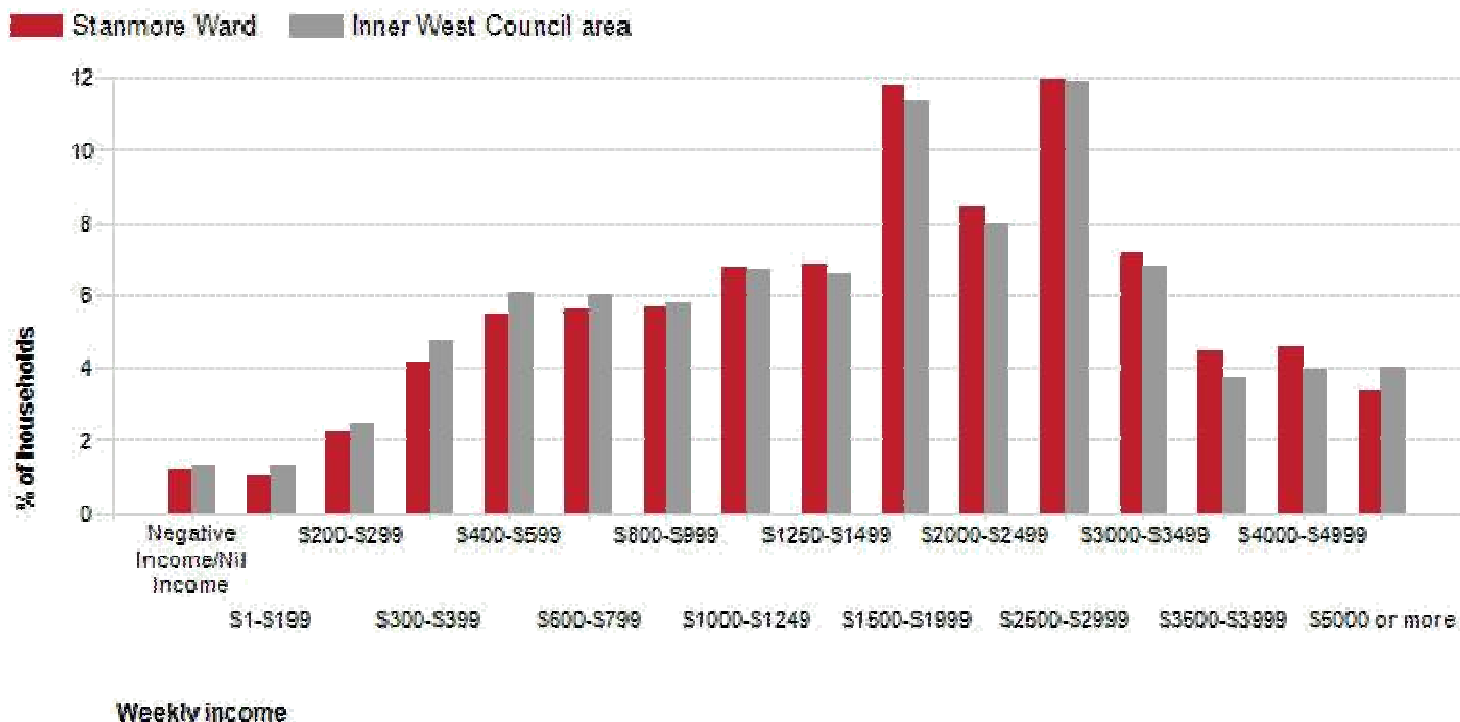

Weekly household income

Dominant groups

Income quartiles allow us to compare relative income-earning capabilities across time. Analysis of the distribution of households by income quartile in Stanmore Ward compared to Inner West Council area shows that there was greater proportion of households in the highest income quartile and a lesser proportion in the lowest income quartile.

Emerging groups

The most significant change in Stanmore Ward between 2006 and 2011 was in the highest quartile which showed an increase of 523 households.

Stanmore Ward

Equivalent household income

While **Household Income** is a useful measure, it is difficult to tell if changes over time and between geographic areas are due to actual changes in income levels, or due to changes in household size and composition. For example, an increase in lower income households could be due to job losses in key economic sectors, or simply due to decreasing household size as adult children leave home.

Equivalent Household Income puts all households on an equal footing independent of household size and composition to enable a true comparison between areas and over time. It is an indicator of the income resource available to a household of standard size and is the best measure of the changing economic fortunes of households living in Stanmore Ward.

A detailed explanation of how Equivalent Household Income quartiles are calculated and interpreted is available in [specific data notes](#).

Equivalent household income quartiles

Stanmore Ward

Source: Australian Bureau of Statistics, Census of Population and Housing, 2006 and 2011 (Enumerated data)
Compiled and presented in profile.id by .id, the population experts.

Dominant groups

Equivalised income quartiles allow us to compare relative income-earning capabilities across time. Because the data is equivalised, households of different size and composition are placed on an equal footing.

Analysis of the distribution of households by income quartile in Stanmore Ward compared to Inner West Council area shows that there was a greater proportion of households in the highest equivalised income quartile, and a lesser proportion in the lowest equivalised income quartile.

Emerging groups

The most significant change in Stanmore Ward between 2006 and 2011 was in the highest quartile which showed an increase of 580 households.

Stanmore Ward

Household type

Stanmore Ward's household and family structure is one of the most important demographic indicators. It reveals the area's residential role and function, era of settlement and provides key insights into the level of demand for services and facilities as most are related to age and household types.

To continue building the story, Stanmore Ward's Household Summary should be viewed in conjunction with [Households with Children](#), [Households without Children](#), [Household Size](#), [Age Structure](#) and [Dwelling Type](#).

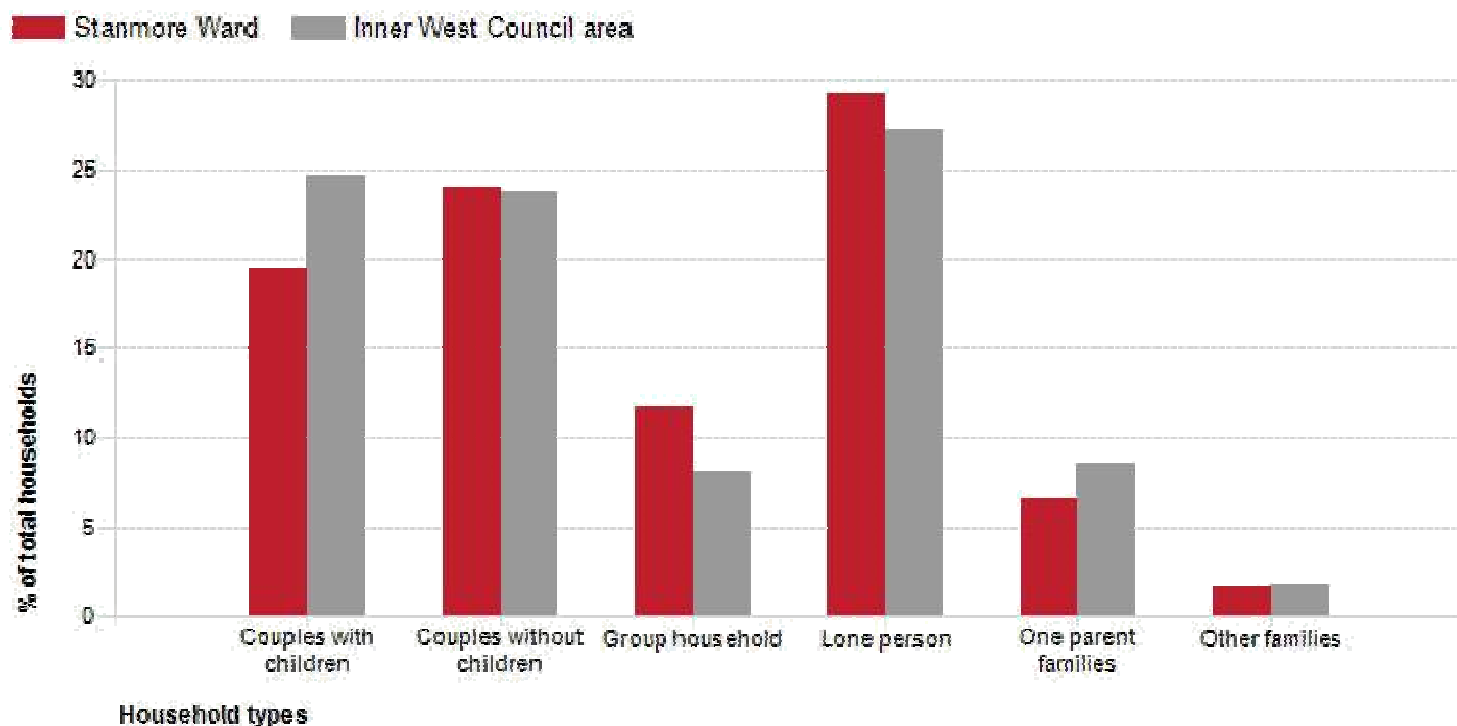

Household type

.id the population experts

Dominant groups

Analysis of the household/family types in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a lower proportion of couple families with child(ren) as well as a lower proportion of one-parent families. Overall, 19.5% of total families were couple families with child(ren), and 6.6% were one-parent families, compared with 24.7% and 8.5% respectively for Inner West Council area.

There were a higher proportion of lone person households and a similar proportion of couples without children. Overall, the proportion of lone person households was 29.2% compared to 27.3% in Inner West Council area while the proportion of couples without children was 24.0% compared to 23.8% in Inner West Council area.

Emerging groups

The number of households in Stanmore Ward increased by 484 between 2006 and 2011.

The largest changes in family/household types in Stanmore Ward between 2006 and 2011 were:

- Couples with children (+467 households)
- Couples without children (+226 households)
- Group household (+117 households)
- Lone person (+63 households)

Stanmore Ward

Households with children

Households with Children require different services and facilities than other household types, and their needs change as both adults and children age. When many families in an area are at the same stage in their individual lifecycles, it creates a suburb lifecycle. Knowing where a suburb is in a cycle of change helps planners make evidence-based decisions about the demand for services both now and in the future.

For Households with Children in Stanmore Ward, life stage is based on the age of children in the household. The age of the parent(s) is not taken into account.

- **Young children:** Children aged under 15 only
- **Mixed age children:** One or more children under 15 and one or more children over 15 (must have 2 or more children)
- **Older children:** Children aged 15 and over only

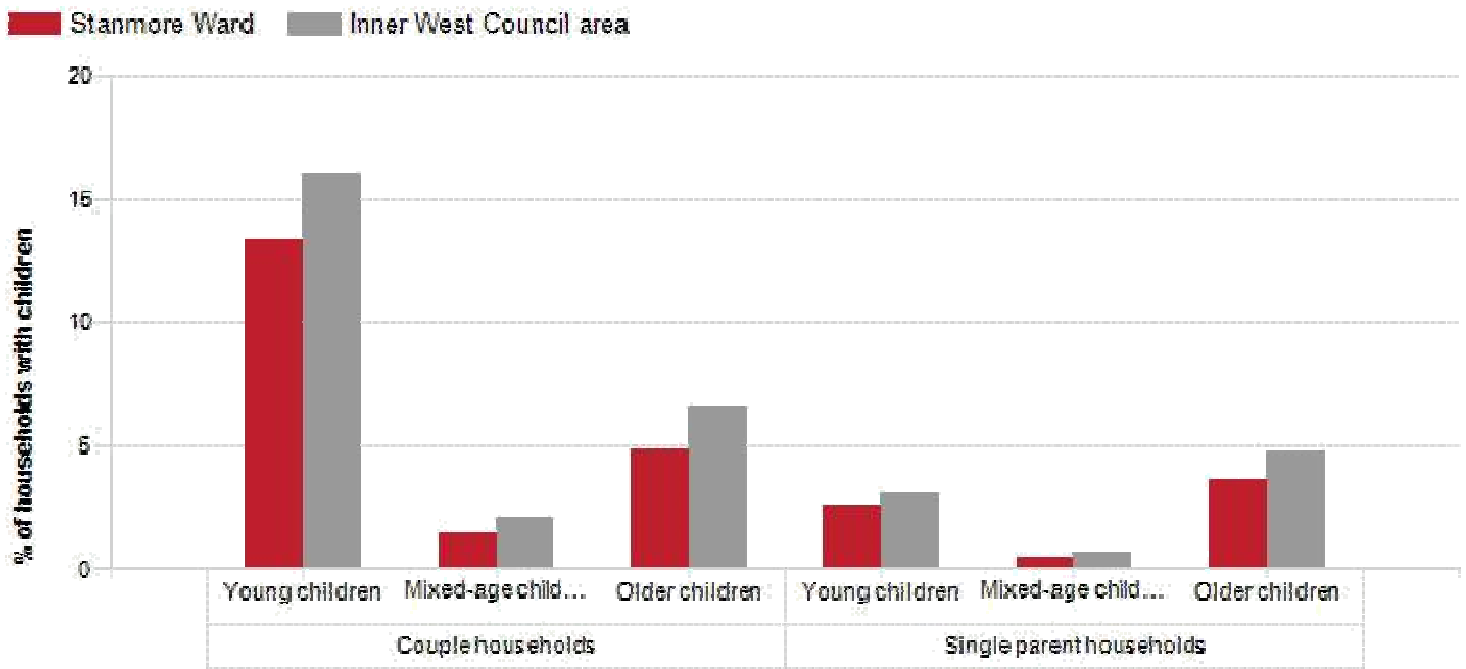

To continue building the story, Stanmore Ward's Household data should be viewed in conjunction with [Household Size](#), [Age Structure](#) and [Dwelling Type](#).

Dominant groups

Analysis of the families with children in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a smaller proportion of couples with young children, as well as a smaller proportion of couples with older children.

Overall, 13.3% of total households with children were couple with young children, and 4.8% were couples with older children, compared with 16.0% and 6.6% respectively for Inner West Council area.

There were a similar proportion of single parent households with young children and a smaller proportion of single parent households with older children. Overall, the proportion of single parent households with young children was 2.5% compared to 3.0% in Inner West Council area while the proportion of single parent households with older children was 3.6% compared to 4.8% in Inner West Council area.

Emerging groups

Between 2006 and 2011, the number of households with children increased by 484 households or 15.3%.

The largest changes in households with children in this area between 2006 and 2011 were:

- Couples with young children (+394 households)
- Couples with older children (+67 households)

Stanmore Ward

Households without children

Households without Children include couples without children and lone person households. They require different services depending on the age of the people in the households. For example young couples who have not had children (yet) compared to older "empty nester" couples whose children may have left home.

For Households without Children in Stanmore Ward, life stage is based on the age of the household reference person (usually person 1 on the Census form):

- **Young:** Aged 15-44
- **Middle-aged:** Aged 45-64
- **Older:** Aged 65 and over

To continue building the story, Stanmore Ward's Household data should be viewed in conjunction with [Household Size](#), [Age Structure](#) and [Dwelling Type](#).

Dominant groups

Analysis of the households without children in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a larger proportion of young couples without children, a smaller proportion of middle-aged couples without children, and a smaller proportion of older couples without children.

In addition, there were a larger proportion of young lone person households, a similar proportion of middle-aged lone person households, and a smaller proportion of older lone person households.

Emerging groups

Between 2006 and 2011, the number of households without children increased by 406.

The largest changes in households without children in Stanmore Ward, between 2006 and 2011 were:

- Middle-aged lone persons (+129 persons)
- Group households (+117 persons)
- Young lone persons (-96 persons)
- Older couples without children (+82 persons)

Stanmore Ward

Household size

The size of households in general follows the life-cycle of families. Households are usually small at the stage of relationship formation (early marriage), and then increase in size with the advent of children. They later reduce in size again as these children reach adulthood and leave home. Household size can also be influenced by a lack (or abundance) of affordable housing. Overseas migrants and indigenous persons often have a tradition of living with extended family members which significantly affects household size.

Household size in Australia has declined since the 1970s but between 2006 and 2011, the average household size remained stable for the nation as a whole.

An increasing household size in an area may indicate a lack of affordable housing opportunities for young people, an increase in the birth rate or an increase in family formation in the area. A declining household size may indicate children leaving the area when they leave home, an increase in retirees settling in the area, or an attraction of young singles and couples to the area.

For greater insight, Stanmore Ward's Household Size data should be viewed in conjunction with [Household Summary](#), [Age Structure](#), [Dwelling Type](#), [Household Income](#) and [Language Spoken at Home](#).

Dominant groups

Analysis of the number of persons usually resident in a household in Stanmore Ward compared with Inner West Council area shows that there were a higher proportion of lone person households, and a lower proportion of larger households (those with 4 persons or more). Overall there were 31.4% of lone person households, and 15.8% of larger households, compared with 28.7% and 19.0% respectively for Inner West Council area.

The major differences in the household size for Stanmore Ward and Inner West Council area were:

- A *larger* percentage of households with 1 person usually resident (31.4% compared to 28.7%)
- A *larger* percentage of households with 2 persons usually resident (36.8% compared to 35.3%) A
- *smaller* percentage of households with 4 persons usually resident (11.7% compared to 13.2%) A *smaller*
- percentage of households with 5 persons usually resident (3.1% compared to 4.1%)

Emerging groups

The number of households in Stanmore Ward increased by 850 between 2006 and 2011.

The largest changes in the number of persons usually resident in a household in Stanmore Ward between 2006 and 2011 were:

- 3 persons (+284 households)
- 4 persons (+278 households)
- 2 persons (+158 households) 1
- person (+84 households)

Stanmore Ward

Dwelling type

Dwelling Type is an important determinant of Stanmore Ward's residential role and function. A greater concentration of higher density dwellings is likely to attract more young adults and smaller households, often renting. Larger, detached or separate dwellings are more likely to attract families and prospective families. The residential built form often reflects market opportunities or planning policy, such as building denser forms of housing around public transport nodes or employment centres.

Dwelling Type statistics should be viewed in conjunction with [Household Size](#), [Household Types](#), [Housing Tenure](#) and [Age Structure](#) for a more complete picture of the housing market in Stanmore Ward.

Dwelling structure

Stanmore Ward - Dwellings (Enumerated)	2011			2006			Change

Compiled and presented in profile.id by .id, the population experts.

Dominant groups

In 2011, there were 3,554 separate houses in the area, 8,153 medium density dwellings, and 3,107 high density dwellings.

Analysis of the types of dwellings in Stanmore Ward in 2011 shows that 23.5% of all dwellings were separate houses; 53.9% were medium density dwellings, and 20.6% were in high density dwellings, compared with 34.0%, 41.4%, and 23.2% in the Inner West Council area respectively.

In 2011, a total of 92.1% of the dwellings in Stanmore Ward were occupied on Census night, compared to 92.6% in Inner West Council area. The proportion of unoccupied dwellings was 7.4%, which is larger compared to that found in Inner West Council area (7.1%).

Emerging groups

The total number of dwellings in Stanmore Ward increased by 602 between 2006 and 2011.

The largest changes in the type of dwellings found in Stanmore Ward between 2006 and 2011 were:

- High density (+508 dwellings)
- Medium density (+369 dwellings)
- Separate house (-272 dwellings)

Stanmore Ward

Number of bedrooms per dwelling

The Number of Bedrooms in a dwelling is an indicator of the size of dwellings, and when combined with Dwelling Type information, provides insight into the role Stanmore Ward plays in the housing market. For example, an area of high density dwellings that are predominantly 1-2 bedroom are likely to attract students, single workers and young couples, whereas a high density area with dwellings that are predominantly 2-3 bedroom may attract more empty nesters and some families.

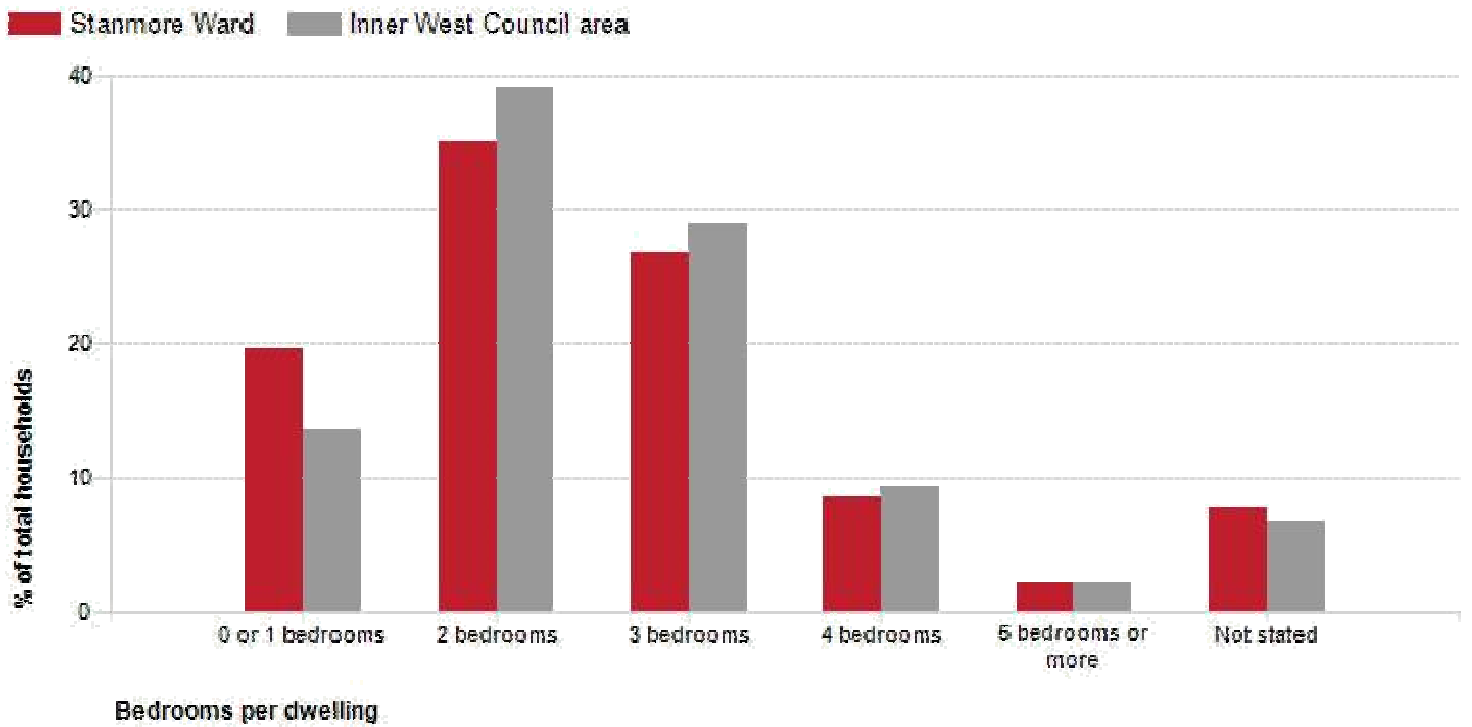

In combination with Household Type and Household Size, the Number of Bedrooms can also indicate issues around housing affordability, overcrowding and other socio-economic factors.

Number of bedrooms per dwelling

Stanmore Ward - Households (Enumerated)	2011			2006			Change
		Inner West Council area			Inner West Council area

Dominant groups

Analysis of the number of bedrooms in dwellings in Stanmore Ward in 2011 compared to Inner West Council area shows that there was a higher proportion of dwellings with 2 bedrooms or less, and a lower proportion of dwellings with 4 or more bedrooms.

Overall, 54.7% of households were in dwellings with 2 bedrooms or less, and 10.7% of 4 or more bedroom dwellings, compared with 52.8% and 11.5% for Inner West Council area respectively.

The major differences between the number of bedrooms per dwelling of Stanmore Ward and Inner West Council area were:

- A *larger* percentage of dwellings with 1 or no bedrooms (includes bedsitters) (19.6% compared to 13.7%)
- A *smaller* percentage of 2 bedroom dwellings (35.1% compared to 39.2%)
- *smaller* percentage of 3 bedroom dwellings (26.8% compared to 28.9%)

Emerging groups

The largest changes in the number of bedrooms per dwelling in Stanmore Ward between 2006 and 2011 were:

- 0 or 1 bedrooms (+317 dwellings)
- 3 bedrooms (+206 dwellings)
- 4 bedrooms (+179 dwellings)
- 2 bedrooms (+176 dwellings)

Stanmore Ward

Internet connection

A fast Internet Connection is increasingly required for accessing essential information and undertaking domestic and non-domestic business. Households with dial-up or no internet service are being left behind in the digital divide as both government and the private sector are increasingly conducting their business, or aspects of it, on-line.

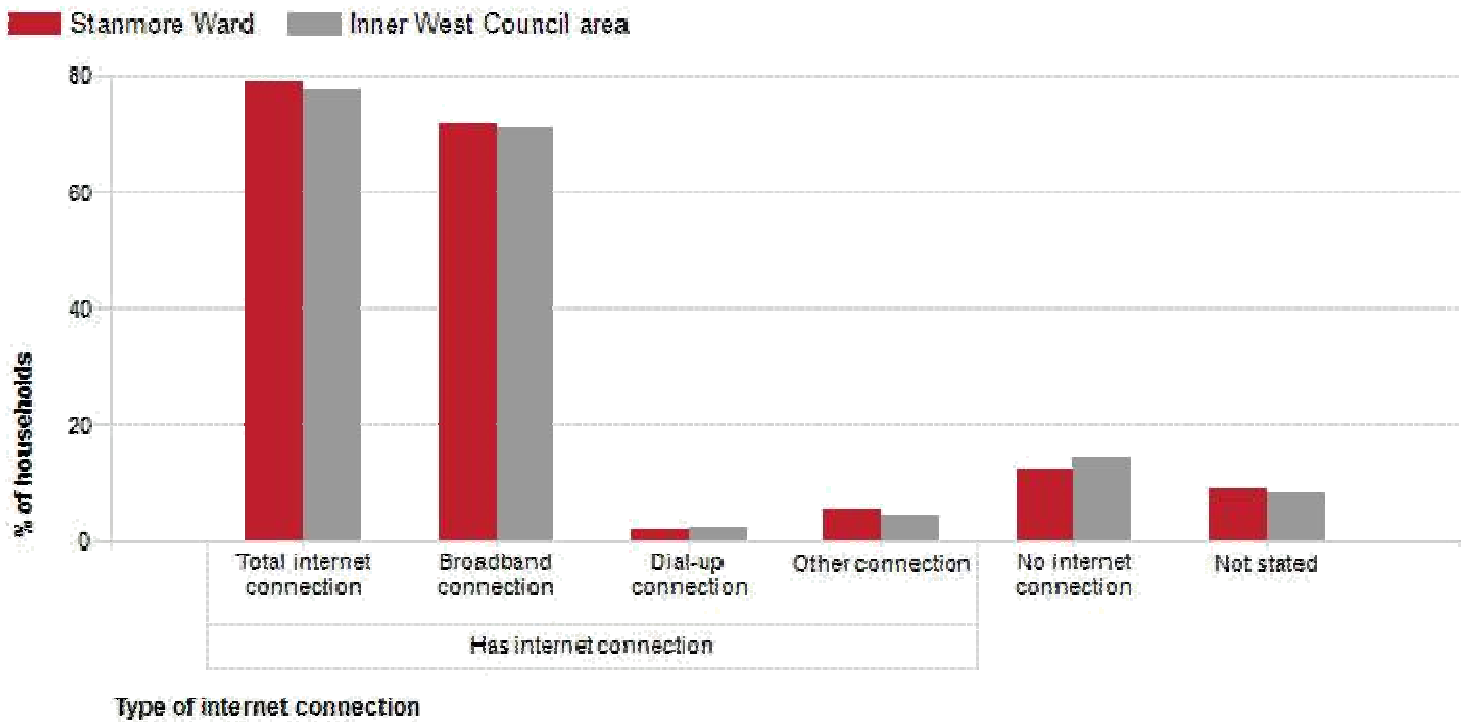

Internet connectivity in Stanmore Ward can be affected by availability of connection, [Education](#), [Household Income](#) and [Age Structure](#).

Type of internet connection

Stanmore Ward - Households	2011			2006			Change
Connection type	Number	%	Inner West Council area %	Number	%	Inner West Council area %	2006 to 2011

Dominant groups

Analysis of the type of internet connection of households in Stanmore Ward compared to Inner West Council area shows that there was a lower proportion of households with either no internet connection or a dial up connection, and a higher proportion of households with broadband connectivity.

Overall 14.1% of households had no internet connection or a dial up connection, and 71.9% had broadband connectivity, compared with 16.4% and 71.1% respectively in Inner West Council area.

Emerging groups

Between 2006 and 2011 the number of households with an internet connection increased by 2,629.

The largest changes in the internet connectivity in Stanmore Ward, between 2006 and 2011 were:

- Broadband connection (+3,973 households)
- Total internet connection (+2,629 households)
- Dial-up connection (-1,943 households)

Stanmore Ward

Number of cars per household

The ability of the population to access services and employment is strongly influenced by access to transport. The number of motor vehicles per household in Stanmore Ward quantifies access to private transport and will be influenced by [Age Structure](#) and [Household Type](#), which determine the number of adults present; access to [Public Transport](#); distance to shops, services, employment and education; and [Household Income](#). Depending on these factors, car ownership can be seen as a measure of advantage or disadvantage, or a neutral socio-economic measure, which impacts on the environment and quality of life.

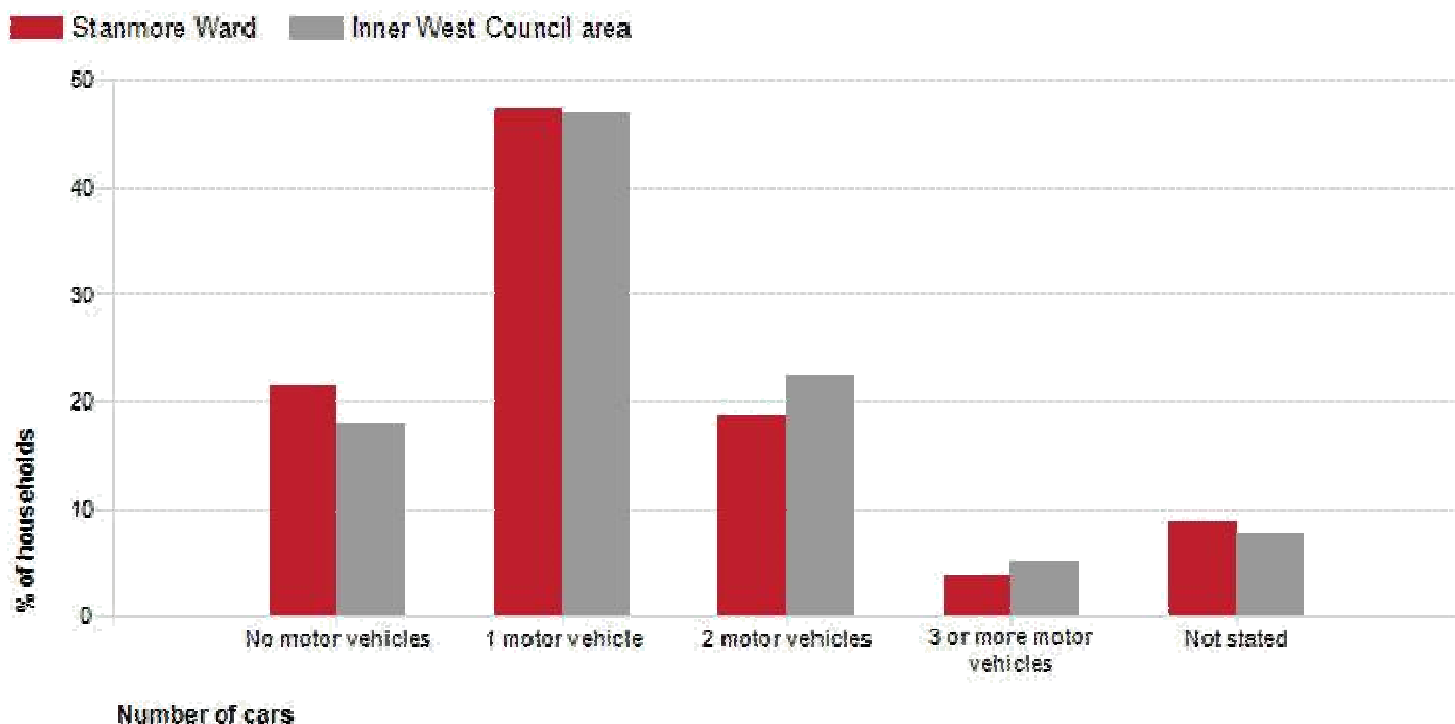

Car ownership

Stanmore Ward

Source: Australian Bureau of Statistics, Census of Population and Housing, 2006 and 2011 (Enumerated data)
Compiled and presented in profile.id by .id, the population experts.

Dominant groups

Analysis of the car ownership of the households in Stanmore Ward in 2011 compared to Inner West Council area shows that 69.7% of the households owned at least one car, while 21.5% did not, compared with 74.3% and 18.0% respectively in Inner West Council area.

Of those that owned at least one vehicle, there was a similar proportion who owned just one car; a smaller proportion who owned two cars; and a smaller proportion who owned three cars or more.

Overall, 47.3% of the households owned one car; 18.7% owned two cars; and 3.8% owned three cars or more, compared with 46.9%; 22.4% and 5.0% respectively for Inner West Council area.

Emerging groups

The largest changes in the household car ownership in Stanmore Ward between 2006 and 2011 were:

- 1 motor vehicle (+760 households)
- 2 motor vehicles (+261 households)
- 3 or more motor vehicles (+96 households)
- No motor vehicles (-78 households)

Stanmore Ward

Housing tenure

Stanmore Ward's Housing Tenure data provides insights into its socio-economic status as well as the role it plays in the housing market. For example, a high concentration of private renters may indicate a transient area attractive to young singles and couples, while a concentration of home owners indicates a more settled area with mature families and empty-nesters ([Household Summary](#)). Tenure can also reflect built form ([Dwelling Type](#)), with a significantly higher share of renters in high density housing and a substantially larger proportion of home-owners in separate houses, although this is not always the case.

In conjunction with other socio-economic status indicators in Stanmore Ward, Tenure data is useful for analysing housing markets, housing affordability and identifying public housing areas.

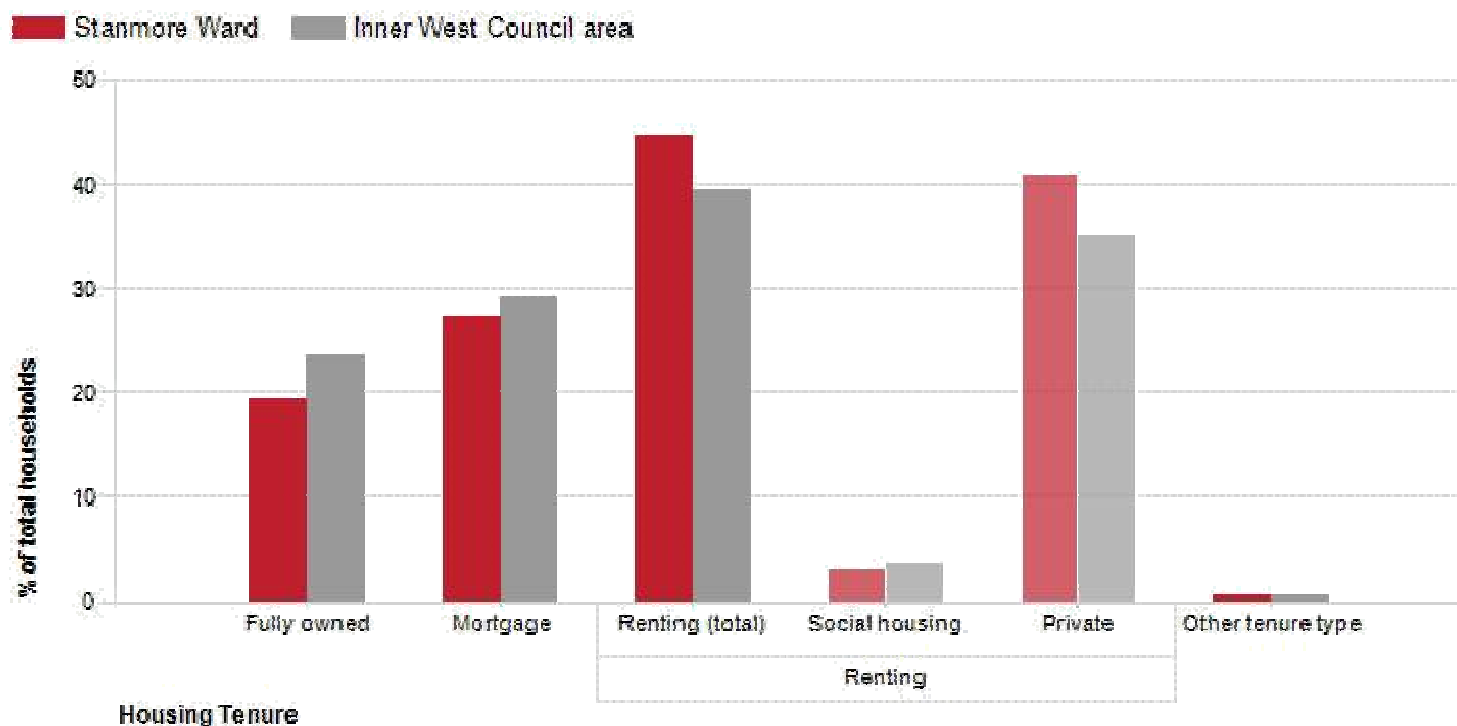

Housing tenure

Dominant groups

Analysis of the housing tenure of the population of Stanmore Ward in 2011 compared to Inner West Council area shows that there was a smaller proportion of households who owned their dwelling; a smaller proportion purchasing their dwelling; and a larger proportion who were renters.

Overall, 19.3% of the population owned their dwelling; 27.4% were purchasing, and 44.6% were renting, compared with 23.6%, 29.0% and 39.6% respectively for Inner West Council area.

Emerging groups

The largest changes in housing tenure categories for the households in Stanmore Ward between 2006 and 2011 were:

- Mortgage (+393 persons)
- Renting - Private (+371 persons)
- Fully owned (+117 persons)

The total number of households in Stanmore Ward increased by 481 between 2006 and 2011.

Stanmore Ward

Housing loan repayments

Mortgage repayments are directly related to house prices in Stanmore Ward, length of occupancy and the level of equity of home owners. When viewed with [Household Income](#) data it may also indicate the level of housing stress households in the community are under. In mortgage belt areas it is expected that households will be paying a higher proportion of their income on their housing compared to well-established areas. First home buyer areas are also likely to have larger mortgages than upgrader areas where households move in with equity from elsewhere.

Mortgage payment levels are not directly comparable over time because of inflation. For comparison of mortgage payments over time, go to [Housing Loan Quartiles](#).

Dominant groups

Analysis of the monthly housing loan repayments of households in Stanmore Ward compared to Inner West Council area shows that there was a larger proportion of households paying high mortgage repayments (\$2,600 per month or more), and a similar proportion of households with low mortgage repayments (less than \$1000 per month).

Overall, 49.6% of households were paying high mortgage repayments, and 10.3% were paying low repayments, compared with 47.3% and 10.4% respectively in Inner West Council area.

The major difference between the household loan repayments of Stanmore Ward and Inner West Council area is:

- A larger percentage of \$3000-\$3999 (20.4% compared to 19.0%)

Stanmore Ward

Housing loan quartiles

Mortgage repayments in Stanmore Ward are directly related to house prices, length of occupancy and the level of equity of home owners. When viewed with [Household Income](#) data it may also indicate the level of housing stress in the community.

The quartile method is the most objective method of comparing change in the mortgage payment profile of a community over time.

A detailed explanation of how Housing Loan Repayment quartiles are calculated and interpreted is available in [specific data notes](#).

Compiled and presented in profile.id by .id, the population experts.

Dominant groups

Housing loan repayment quartiles allow us to compare relative repayment liabilities across time. Analysis of the distribution of households by housing loan repayment quartiles in Stanmore Ward compared to Inner West Council area shows that there was a larger proportion of households in the highest repayment quartile, and a smaller proportion in the lowest repayment quartile.

Emerging groups

The total number of households with a mortgage in Stanmore Ward increased by 456 between 2006 and 2011. The most significant change in Stanmore Ward during this period was in the highest quartile which showed an increase of 319 households.

Stanmore Ward

Housing rental payments

Rental payments can be a better measure of the cost of housing in Stanmore Ward than mortgage repayments because they are not contingent on length of occupancy or equity in the dwelling.

High rental payments may indicate desirable areas with mobile populations who prefer to rent, or a housing shortage, or gentrification. Low rental payments may indicate public housing (check [Tenure Type](#)), or areas where low income households move by necessity for a lower cost of living.

Rental payments are not directly comparable over time because of inflation. For comparison of rental payments over time, go to [Housing Rental Quartiles](#).

Weekly housing rental payments

Emerging groups

The total number of households renting their dwelling in Stanmore Ward increased by 339 between 2006 and 2011. The most significant change during this period was in the highest quartile which showed an increase of 212 households.

Inner West Council area

Migration summary

Migration, or residential mobility, together with births and deaths are significant components of population change in Australia. The movement of people into, and out of an area directly influences the characteristics of the population and the demand for services and facilities. Migration is the most volatile component of population change and can be affected by changing housing and economic opportunities such as housing affordability issues or the mining boom. There are three main types of migration in Australia, overseas migration, between-state migration, and within-state migration. By far the most common form of migration is within-state, and largely involves moves between neighbouring and existing urban areas where moves are often short.

Looking at the level and type of migration in the Inner West Council area can indicate whether the population is sedentary and likely to be in the area for a long time (and perhaps have significant ties to the community), or transient, and likely to move on. Related topics which can be viewed to get a clearer picture of population mobility include [Age Structure](#) and [Housing Tenure](#).

Inner West Council area

Migration by location

Understanding where the Inner West Council area's current residents have moved from helps in predicting future mobility patterns and demographic change. Understanding where the Inner West Council area's residents are moving to indicates areas of population growth and informs possible strategies to retain and attract residents.

Generally, areas of new housing growth attract residents from established areas, especially young couples and families. Coastal communities attract retirees and people seeking a lifestyle change, while inner city areas and areas near universities attract young adults. These are broad demographic trends, while local demographic factors also have a major impact on population movement.

The Inner West Council area's migration data below provides a summary of where current residents lived five years prior to the last Census. The top ten local government areas of population movement are ranked, based on net change - that is, the difference between those who moved in and those who moved out. The areas with the greatest net change (gain or loss) to a particular area may not necessarily be those with the greatest population exchange.

Inner West Council area

Migration by age

The age structure of people who move into and out of the Inner West Council area is strongly influenced by the residential role and function of the area and can influence demand for particular services. For instance, inner city areas near employment, education and entertainment tend to attract many young people in their late teens and early twenties, who move out in their late twenties and thirties to start families in suburban areas. Rural areas tend to lose young people and gain older families and retirees.

Understanding the Inner West Council area's attraction to different age groups helps to plan services for the community as well as advocating with other levels of government and private enterprise to provide infrastructure, employment opportunities and facilities which may help to retain age groups which are otherwise leaving the area.

Inner West Council area

Residential building approvals

The Inner West Council area's building approvals are used as a leading indicator of the general level of residential development, economic activity, employment and investment. Residential building activity depends on many factors that vary with the state of the economy including interest rates, availability of mortgage funds, government spending, and business investment. Large financial changes or shocks, such as the Global Financial Crisis of 2008/09 can be observed in the data. However, the number of building approvals can fluctuate substantially from year to year simply as a result of the short-term nature of many construction projects, and the cyclical nature of the industry.

Inner West Council area

Workers' place of residence

Where does the Inner West Council area's workforce come from? Journey to Work data sheds light on how many workers live locally, how many commute from other areas and which areas they commute from. Some areas attract a large external workforce because they have major employment centres or because local residents have a different set of skills or aspirations than the local jobs require. Understanding where workers reside assists in planning and advocacy for roads and public transport provision. It also helps to clarify economic and employment drivers across areas and assists in understanding the degree to which the Inner West Council area provides local employment.

Inner West Council area

Residents' place of work

Where do the Inner West Council area's residents go to work? Journey to Work data shows how many residents work locally, and how many commute out of the area and where they commute to. Some areas consist mainly of dormitory suburbs and the majority of the residents commute out to work. Other areas have large employment centres which attract a local workforce. Understanding where the Inner West Council area's residents go to work assists in planning and advocacy for roads and public transport provision. It also helps to clarify the economic and employment drivers across areas and assists in understanding the degree of employment self-containment within the Inner West Council area.

Overview

Employment location of resident workers

Inner West Council area		2011	
Status	Number	%	
Live and work in the area	17,197	18.6	
Live and work in the same SLA	13,269	14.3	
Live in the area and work in different SLA	3,928	4.2	
Live in the area, but work outside	67,172	72.6	
Work location unknown	8,129	8.8	
Total employed residents	92,498	100.0

Inner West Council area

SEIFA - disadvantage by Local Government Area

The Inner West Council area SEIFA Index of Disadvantage measures the relative level of socio-economic disadvantage based on a range of Census characteristics. It is a good place to start to get a general view of the relative level of disadvantage in one area compared to others and is used to advocate for an area based on its level of disadvantage.

The index is derived from attributes that reflect disadvantage such as low income, low educational attainment, high unemployment, and jobs in relatively unskilled occupations. When targeting services to disadvantaged communities, it is important to also look at these underlying characteristics as they can differ markedly between areas with similar SEIFA scores and shed light on the type of disadvantage being experienced.

A higher score on the index means a *lower* level of disadvantage. A lower score on the index means a *higher* level of disadvantage.

Index of Relative Socio-economic Disadvantage

Local Government Areas in New South Wales

Local Government Area	2011 index
Ku-ring-gai (A)	1,120.7
Mosman (A)	1,110.7
Woollahra (A)	1,107.0
Lane Cove (A)	1,106.9
The Hills Shire (A)	1,104.8
North Sydney (A)	1,104.8
Manly (A)	1,099.4
Pittwater (A)	1,094.4
Hunters Hill (A)	1,092.2
Hornsby (A)	1,085.2

Inner West Council area

SEIFA - disadvantage by small area

The Inner West Council area SEIFA Index of Disadvantage measures the relative level of socio-economic disadvantage based on a range of Census characteristics. It is a good place to start to get a general view of the relative level of disadvantage in one area compared to others and is used to advocate for an area based on its level of disadvantage.

The index is derived from attributes that reflect disadvantage such as low income, low educational attainment, high unemployment, and jobs in relatively unskilled occupations. When targeting services to disadvantaged communities, it is important to also look at these underlying characteristics as they can differ markedly between areas with similar SEIFA scores and shed light on the type of disadvantage being experienced.

A higher score on the index means a *lower* level of disadvantage. A lower score on the index means a *higher* level of disadvantage.

The percentile column indicates the approximate position of this small area in a ranked list of Australia's suburbs and localities. It's meant to give an indication of where the area sits within the whole nation. A higher number indicates a higher socio-economic status. For instance, a percentile of 72 indicates that approximately 72% of Australia's suburbs have a SEIFA index lower than this area (more disadvantaged), while 28% are higher.

Index of Relative Socio-economic Disadvantage

Inner West Council area's small areas and benchmark areas

Area	2011 index	Percentile
Birchgrove	1,124.3	99
Rozelle	1,107.4	97
Camperdown	1,099.4	95
Balmain East	1,096.4	94
Annandale	1,086.9	91
Balmain Ward	1,085.2	90
Balmain	1,079.7	88
Stanmore	1,073.9	86
Newtown	1,068.9	84
Leichhardt	1,062.5	81

About the community profile

Demographic change across Australia is recorded by the Australian Bureau of Statistics (ABS) in the Census collections every five years. [Population experts, .id](#), analyse and convert these raw figures into stories of place to inform council staff, community groups, investors, business, students and the general public.

The Inner West Council area Community Profile provides demographic analysis for the Council and its suburbs based on results from the 2011, 2006, 2001, 1996 and 1991 Censuses of Population and Housing. The profile is updated with population estimates when the Australian Bureau of Statistics (ABS) releases new figures such as the annual Estimated Resident Population (ERP).

Suburb boundaries and Census questions change over time, but .id manages the data to ensure that there is an accurate time series provided for the current geographic boundaries. You can read more about this in the [Geography Notes](#) section.

Results for the Inner West Council area include population, age structure, ethnicity, ancestry, religion, income, qualifications, occupations, employment, unemployment, disability, disadvantage, volunteering, childcare, family structure, household structure, housing tenure, mortgage and rental payments, and the size and type of the dwellings people live in.

The Community Profile presents this information in clear maps, tables and charts with concise factual commentary to answer three important questions:

1. What are the characteristics of the people who live here?
2. How are they changing?
3. How do they compare to other areas?

This provides the basis for making evidence-based decisions about how to provide services for the community as it changes.

You can be confident about the quality of the information as it is derived from Australian Bureau of Statistics data, analysed and presented by population experts and funded by the Inner West Council area.
