Respond to the questions asked based on your child's swimming ability. Try to be as objective as possible. If students are booked into the incorrect level, we may not have space in the correct level at a day and time that works for you. Incorrect bookings will be moved or cancelled at the discretion of the Swim School. All efforts will be made to find the correct class at a time that works for you.

Learn to swim assessment guide

Early Tadpoles

This is our bridging level between our water familiarisation program and our Learn to Swim program.

The class focuses on water safety with safe entries and exits from the pool, building on confidence in the water through supported floating, gliding, propulsive swimming, and breath control. Parents have the option to stay in the water in this level while their child requires their support, working towards their child participating independently.

We are delighted to see that our learn to swim classes are in high demand! Open the booking link for your preferred centre below to find a list of our available class times, along with the current classes that are fully booked. If you don't see a class that fits your schedule, don't worry! You can easily add yourself to our mailing list for any full class, and we will send you a monthly update on availability. We encourage you to keep an eye out online for any new openings as well.
