HOW THE BEAUTIFUL WORLD

WAS MADE

Have you ever wondered how our planet became so beautiful well its thanks to the elements, parts in the environment that help fulfil our desires. And it all started when mother nature gave this planet 4 of the main elements, Air, Earth, fire and water.

"Wow what is this place?" Air exclaimed - "It must be hell" Earth said "Did we do sth wrong? Why did you bring us here?" fire asked mother nature. Mother nature smiled and said "I want u to ^{turn} create this place into a paradise." ; "How the ^{heck} will we do that?" a 4 asked but she already disappeared.

The 4 sat there wondering what to do until water poured a little water on the ground and suddenly a figure appeared. "Hi, I'm puddle" the figure, puddle said - "Where did you come from?" Fire asked "I dunno, she created me" puddle pointed at water.

That's when all of them knew exactly how to ~~simple~~ complete mother nature's mission. They split up and started ~~no~~ creating other elements by ~~combining~~ combining different elements together. The more elements were created the more colorful the planet became.
