

The special island

Ahhhhhhh!!! As Jack screams in fear, he arrives at a secret island that was first formed in 1723. On the island, he saw a dinosaur and then more dinosaurs. He couldn't believe it. Dinosaurs died over 66 million years ago. Maybe that meteorite supposedly bigger than mount Everest didn't take 3 quarters of the world including dinosaurs.

1 week of exploring the island with the non-harming dinos, he went back to Australia to reveal the island had harmless dinosaurs.

2 weeks later he started to feel special and he had really good luck. When he was looking to be a lawyer, he became a lawyer and he wished to win his first case and sooner or later he won the case. He got his best friend out of maximum prison.

1 year later Jack was willing to visit the island again and he had a very fun time there. He thought there will be no dinosaurs when he got there but to his surprise there were 2 dinosaurs and he was happy because it was the dinosaurs that he had been friends with. The dinosaurs welcomed him to the place once again. He and the dinosaurs had fun playing games.

It had been a fun time there but he had to go back to New York to provide for his family. As he said his goodbyes forever, he thinks and never forgets about everything that happened on that island.

The million dollars
